CD: Eurodance Club Volume 1 (Back2Basic)

3H Records is launching a new CD compilation series this year which is dedicated to the most successful genre of the last 25 years: the EURODANCE.

The volume and versatility of this music direction is conveyed impressively on a total of 20 tracks on this "Volume 1 - Back 2 Basic" compilation. In addition to classic Eurodance productions, this CD also contains high-quality songs, which can be found in the genre Vocaltrance, Dancepop, Clubdance and Dreamdance. In addition, the respective producers and / or artists are not only from Europe. 3H Records has searched the whole world for attractive music and even found it in Australia.

There is also a balanced mix of established Eurodance superstars and less well-known producer teams and dance acts, for which EURODANCE CLUB can become a jumping board to start a sensational career. A lot of info is in the detail-loving booklet of the CD, where every artist is presented in word and picture in detail.

After all, all the tracks were packed in a clever way, so you would like to play them completely from beginning to end, without risking that you will be boring to hear them at some point. Insert CD, play press and have fun. The joy of the music is only „a press button“ away.

Eurodance Club Volume 1 "Back2Basic" is released as a CD and digital download in the distribution of Timezone, <http://www.timezone-records.com> in regular shops on 07th April 2017

Further information on the CD and 3H Records can be found on the Internet at www.eurodance-club.de
